Ben Arous, Tunisia

EDUCATION

2019 – 2022
Engineering degree in Electromechanics
ESPRIT – École Supérieure Privée d'Ingénierie et de Technologies
Major: Industrial Organization & Management

2016 – 2019
Applied Bachelor's in Mechanical Engineering
Higher Institute of Technological Studies of Siliana
Major: Industrial Maintenance

2015 – 2016
Baccalaureate
Ahmed Amin High School, El Mourouj
Track: Technical Sciences

SKILLS

Design & simulation
SolidWorks · Altium Designer · FlexSim · Mastercam

Lean manufacturing
SMED · Kaizen · Kanban · VSM

Quality management
FMEA (AMDEC) · TPM · Pareto · 5S

Management & planning
SAP (MM & PP) · PERT · Gantt

Office tools
Excel · Word · PowerPoint

LANGUAGES

Arabic — Native ●●●●●

French — Read, written, spoken ●●●●○

English — Read, written, spoken ●●●●○

CERTIFICATES

- **Mastercam 2D Mill** — Certificate of Completion
- **Mastercam Lathe** — Certificate of Completion
- **Mastercam 3D Mill** — Certificate of Completion

ELECTROMECHANICAL ENGINEER

MABROUK HAJJI

Management Controller · MDO – Marbre Design & Objet

Specialization in Industrial Organization & Management

PROFILE

Electromechanical engineer trained at ESPRIT, specialized in industrial organization and management. Four years at MDO – Marbre Design & Objet, moving from the production floor to management control: workplace organization, safety, inventory management, cost tracking and performance indicators. A solid grounding in industrial maintenance, Lean manufacturing and quality tools.

PROFESSIONAL EXPERIENCE

MDO – Marbre Design & Objet — 11/2022 – Present

Current position · 3 successive roles

Management Controller — 11/2024 – Present
- Cost tracking and analysis
- Design and monitoring of performance indicators (KPIs)
- Support for strategic decision-making

Inventory Manager — 11/2023 – 11/2024
- Managed stock receipts and issues
- Inventory tracking and cost optimization

Production Assistant to the Production Manager — 11/2022 – 11/2023
- Workplace organization
- Productivity and safety improvement

DEFONTAINE Tunisie — 03/2022 – 09/2022

Engineering final-year internship

- Improved the OEE of a production-line machine with the methods department
- Implemented a preventive and first-level maintenance plan
- Created autonomous-maintenance sheets, cleaning routines and tracking sheets
- Led a 5S workshop in the production area

UNILEVER — 07/2021 – 09/2021

Engineering internship

- Study of the company's transport modes

R.N.T.A – Régie nationale des tabacs et des allumettes — 02/2019 – 06/2019

Bachelor's final-year internship

- Reorganized the maintenance department
- Created the working documents used by the maintenance team
- Set up a CMMS (computerized maintenance management system)

ADDITIONAL INTERNSHIPS

01/2019 – 02/2019 **KIA Motors (Best Car)** — Study of braking systems

01/2018 – 02/2018 **Ideal Sanitaire** — FMEA failure analysis of a speed reducer

01/2017 – 02/2017 **Introductory internship** — Integration into a professional setting; cultivation and upkeep methods

ACADEMIC PROJECTS

Smart renewable-energy robotic arm
Mechanical design in SolidWorks, electronics in Altium and an Android control app.

Process FMEA: PCB manufacturing
Diagnosis and risk assessment across each step of the board manufacturing process.

Agricultural drone
Mechanical design in SolidWorks and electronic design in ISIS.

Sustainability & CSR
Occupational health & safety and environmental risk analysis for a company.
